Sarasota, FL 34277

Dear Kevin:

Thank you for kicking off our **EYES ON THE SKIES** series with your "Astronomy for Everyone: Size & Scale of the Universe" program. We were thrilled with the standing room only crowd and your presentation was outstanding. Looking at the Moon, Saturn and Jupiter through the telescope was an added bonus and those who participated loved it.

Thanks, also, for helping us bring this wonderful program to the Crandall Public Library Community. I attended as a spectator, not as the Director, and I was moved by both your funny, comprehensive and elegant presentation, and our audience's own exposure to the wonders of the cosmos.

Sincerely,

Kathleen U. Naftaly  
Director
