Kevin Manning

Dear Kevin,

On behalf of the Retired Men's Association, I would like to thank you for an interesting and informative presentation on **Astronomy for Everyone: Size & Scale of the Universe**. The sharing of your insight and knowledge about the universe gave us all a greater understanding of the heavens. It gave us a new and exciting way to see the enormous world we live in every day.

Helping us understand the universe around us, gave us a vision into new interests which involve science and beauty, the pictures and dialog - enjoyable.

There were many questions and much enthusiasm by the group - great talk.

Thank you again for your time and a fine presentation. I know you gave us all things to look at with different eyes.

Sincerely,

*Chris*
